

SERVERS FOR WEB ENABLED SPEECH RECOGNITIONABSTRACT OF THE DISCLOSURE

5 A markup language for execution on a client device in a
client/server system includes instructions to unify at least one
of recognition-related events, GUI events and telephony events on
non-display, voice input based client device and a multimodal
based client for a web server interacting with each of the client
devices. A recognition server for receiving data indicative of
10 inputted data provided to a client device and an indication of a
grammar to use for recognition is also provided.
